

Superoxide Dismutase (SOD)

Siberian Chaga extract contains an extraordinary amount of SOD, Superoxide Dismutase. SODs are enzymes that keep cell membranes supple and healthy. SOD enzymes decrease as we age, depending on genetic predisposition.

SOD Testing

We quantified the levels of antioxidant activity of SOD enzymes and determined that Wildcrafted Siberian Chaga had values that are extraordinarily high in comparison to other medicinal mushrooms and popular juices having high antioxidant content. These tests give further proof of the extraordinary antioxidant properties and protective effects of Chaga, resulting from all the phytoactive ingredients in its make-up.

SOD Value Per Gram Analysis and Study:

(Dept. of Health and Food Services Research Center - Tokyo, Japan)

Siberian Chaga	35,000 units/g
Linghzi/Reishi	1,400 units/g
Truffles	860 units/g
Agaricus	1,500 units/g
Phellintus Linteus	1,400 units/g
Grifola Frondosa	1,400 units/g
